# INTRODUCTORY NOTE

1. The Directory of Electronic Data Processing (EDP) Specialists in Africa aims primarily at facilitating technical co-operation among the countries of the region in the area of data processing.

2. The information provided in this document is mainly derived from the EDP capabilities survey undertaken in 1983. Data from the 1981 survey are also used in cases where they do not appear to have changed. The result is unfortunately far from comprehensive due particularly to a low rate of response. It is hoped that the coverage will improve for the next issue.

3. The present issue of the Directory refers only to systems and programming staff. It should however be mentioned that the educational background of this personnel varies widely from one country to another. Furthermore, the information available does not allow for clear distinctions between data processing specialists or experts and other EDP personnel.

4. For each country, the EDP specialists are classified in alphabetical order. The year of birth, when it is available, is indicated after the name of the individual concerned, then follow the qualifications, the year(s) when obtained and the university/institute where training was received. Finally the present post occupied by the individual and the institution are shown.

## NOTE D'INTRODUCTION

1. Le Répertoire des spécialistes du traitement électronique de l'information (TEI) en Afrique vise à faciliter la coopération technique entre les pays de la région en matière d'informatique.

2. L'information fournie dans ce document provient essentiellement de l'enquête sur les dispositifs en matière du TEI qui a été entreprise en 1983. On a aussi utilisé des données de l'enquête faite en 1981 chaque fois que celles-ci ne semblent pas avoir changé. Le résultat obtenu est malheureusement loin d'être exhaustif, à cause particulièrement d'un taux de réponse faible. On espère que la couverture s'améliora avec la prochaine édition.

3. La présente édition du Répertoire ne concerne que le personnel des systèmes et de programmation. On doit cependant signaler la très grande variation de formation de base d'un pays à l'autre. En outre, l'information disponible ne permet pas de faire une distinction claire entre les spécialistes ou experts du traitement de l'information et les autres catégories du personnel du TEI.

4. Pour chaque pays, les spécialistes du TEI sont classés par ordre alphabétique. L'année de naissance, quand elle est disponible est indiquée à côté de chaque nom. Viennent ensuite les diplômes, l'année d'obtention de ces diplômes, et l'université ou l'institut de formation. Enfin, on a mentionné le poste occupé par le spécialiste et l'adresse professionnelle.
